

As of September 27th, 2016

All polyethylene (black jacket) air duct and air connector products will no longer be available in Canada from IMG.

ULC recently changed the way they measured the Flame Spread Rating (FSR) and Smoke Developed Classification (SDC) of our MEI and DEI products. They now use Test Method CAN/ULC-S102.2 while previously they used CAN/ULC-S102. In S102.2, which is used for products containing thermoplastics, MEI and DEI products have a FSR and SDC higher than what is allowed for ducts and connectors in the code bodies.

IMG's polyethylene (black jacket) air duct and air connector products are discontinued due to new ULC regulatory changes. These products will no longer be available in Canada from IMG as of September 27, 2016.

DEI & MEI

**Black Polyethylene Vapor Barrier
(Black Jacket)**

DISCONTINUED

As of September 27th, 2016

MEA

**Metalized Vapor Barrier
(Silver Jacket)**

REPLACEMENT

ULC Approved

- Meets ULC S-110 Class 1 air duct standards
- The fiberglass reinforced metalized outer jacket is extremely strong and will not unravel
- Suitable for use with heating, ventilation and air conditioning systems
